Tangshan Bencheng Science & Technology Co., LTD.

Company Profile:
We are a professional manufacturer of various guard rails, safety crash barrier and metal-fabricated products.

Our Traffic facility factory is established in 1998, occupying an area of 49,500 square meters. We have more than 300 employees, including 3 senior engineers, 12 engineers and 30 technicians. We have complete production line for various traffic products, such as production line for two and three waves of guardrail beam, pipe-cutting and punching, and we have our own powder coating workshop and hot dipped galvanizing workshop. We can also customize traffic products and metal products according to clients' requirements.

We warmly welcome you to visit our factory in future.
